# Global SMS A2P solutions

Dott is the Communication Service Provider connecting globally business and operators

# Company Values

01

## Vast industry knowledge

Extensive web, telecom and IT experience combined by the founders and Management team.

## Technologically advanced

We developed in-house SMS platform according to latest technology and market trends, thus we know how SMS works and fully control the process assuring high end-to-end quality.

## Think global and understand local

Our diverse international team speaks major foreign languages and builds solid close relationships based on flexibility, understanding and respect of our customers.

## Connect the businesses and WEB players with Telecoms

We have an API platform to enable businesses, developers and all kind of WEB players to connect to telecom services and reach to mobile users.

# Features & Benefits

02

## Optimal real-time Routing

We ensure that we match your messaging needs with the right route to deliver to the handset.

## Value

Maximize your SMS profit, effectively serving the long tail of destinations. Get revenues from capitalizing on your current B2B business by ensuring reliable international SMS A2P termination.

## High Throughput

Achieved 1000 SMS/sec! Tested in real world scenario with application connected to gateway over SMPP

## Simplicity

Just one connection gains access to our existing infrastructure, both technical and contractual.
